PROFESSIONAL SUMMARY

A proactive BSc (Hons) Information Technology undergraduate at SLIIT with hands-on experience in Java, C#, PHP, React.js, SSMS, MySQL, RESTful APIs, Git, and basic UI design using Canva. Strong communicator who collaborates effectively in teams, solves complex problems, and demonstrates leadership in project settings. Seeking a software engineering internship to apply full-stack development skills, gain production experience, and contribute to scalable solutions. Eager to deliver reliable code and quick learning on the team, making me a strong fit for a fast-paced development role.

EDUCATION

BSc (Hons) in Information Technology (Specialization: Information Technology)

2024 – 2028 (Expected)

Sri Lanka Institute of Information Technology (SLIIT), Northern Uni, Jaffna, Sri Lanka.

NVQ Level 4 in Information and Communication Technology Technician (6 months)

2023 Vocational Training Authority of Sri Lanka (VTA).

PROJECTS

Full Stack Tuition Management System | Jan 2026 – May 2026

Technologies: PHP, React.js, MySQL, OTP Authentication, Postman, GitHub

- Collaborated with a team of 6 to build a full-stack web application for tuition management using PHP, React.js, and MySQL.
- Architected and developed the Tutor Management Module, integrating tutor login with OTP authentication, overview dashboard, attendance tracking, leave request submission and approval, user profile management, and tutor notification system
- Engineered RESTful backend APIs for tutor management features and conducted API integration and testing using Postman
- Managed version control and collaborative development using GitHub.

Movie Ticket Booking System | Feb 2025 – June 2025

Seat Booking Module | Technologies: Java, OOP, Maven, Servlet, HTML, CSS, JavaScript, GitHub

- Built the Seat Booking Module for a Movie Ticket Booking System Using Java.
- Implemented seat selection, reservation, and availability management for a system supporting 100+ seat configurations across multiple screens Applied Object-Oriented Programming (OOP) principles to design reusable and maintainable code.
- Collaborated with team members to integrate booking functionality into the overall system.
- Conducted testing and debugging to improve system functionality and user experience.
- Used GitHub for version control and collaborative development.

MINI PROJECTS

Expense Tracker | <https://expense-tracker-c936.vercel.app/>

Technologies: HTML, CSS, JavaScript, Local Storage, GitHub

- Created a web-based Expense Tracker application using HTML, CSS, and JavaScript.
- Implemented income and expense management features with real-time balance calculation.
- Built transaction tracking functionality to record and manage financial activities.
- Leveraged Local Storage for client-side data persistence and retrieval. Used GitHub for version control and project management.
- Implemented input validation and error handling to improve data accuracy and user experience.

- ♦ Conducted unit testing and debugging to ensure application reliability, identifying and resolving 15+ bugs before deployment.

To-Do Task Manager | <https://to-do-seven-coral.vercel.app/>

Technologies: HTML, CSS, JavaScript, Local Storage, GitHub

- ♦ Engineered a web-based To-Do Task Manager application using HTML, CSS, and JavaScript.
- ♦ Built task creation, completion tracking, and task deletion functionalities.
- ♦ Built user authentication and session management using Local Storage.
- ♦ Integrated activity history tracking and dark mode features to enhance user experience.
- ♦ Employed testing and debugging techniques to ensure application reliability and performance.
- ♦ Used GitHub for version control and collaborative development.

TECHNICAL SKILLS

Backend Technologies: ASP.NET Core Web API, JSON, RESTful APIs.

Databases: MongoDB, MySQL, SQL Server (SSMS).

Frameworks & Libraries: Bootstrap, React.js.

Programming Languages: C#, CSS, HTML, Java, JavaScript, PHP, Python (Basics).

Tools: Access, Canva, Excel, Gamma, Git, GitHub, Postman.

ADDITIONAL INFORMATION

Availability: Seeking Internship, Part-Time, Remote (Work from Home), and Entry-Level Software Development Opportunities.

Interests: Competitive Programming, Error Detection and Debugging, Frontend Development, Full-Stack Development, Software Design and Development, Open-Source Development.
